Company Quality Policy

At SEA CAN Systems Inc. quality and our commitment to customer satisfaction is at the core of our success. It is an important part of our legacy and corporate culture in establishing our brand. We strive to perform all processes reliably to desired targets while avoiding the costs of poor quality.

All of our staff is committed to doing it right the first time, every time guided by the following principles:

- **Customer Focus** – We excel at understanding and interpreting our customers' needs for quality and reliable product delivery of products and services that add value.
- **Market Focus** – We understand new and existing market requirements and competitive trends. We rapidly innovate to meet our customers' needs and accelerate bringing those solutions to market.
- **Relationships** – We proactively foster strategic business partnerships with customers and suppliers that improve quality and enhance business results.
- **Leadership** – We build a shared vision, align our organization to support that vision and create engaging work environments. We enable position ownership for employees to directly engage in meeting the corporate vision.
- **Process Focus** – We establish a corporate culture to create and improve processes to achieve our customer quality objectives and to eliminate bottlenecks.

SEA CAN Systems Inc. is committed to the **continual review and improvement** of the Quality Management System.
